

Surprise Dad with a Skylanders Picture Frame!

For Father's Day, give dad a picture frame created by you, so he will always remember this day with happiness.

1. First of all, you will need a piece of a thick and tough cardboard. You must draw in pencil the shape of your favorite Skylander's face, which will be then used for making the frame. In this example, *Ninjini* has been the character chosen. She has a very long red hair up in a ponytail and a blue face. Afterwards, you must draw a small rectangular piece, having one of the sides smaller than the other one, in order to hold the frame.

2. Now you will need help from an adult in order to cut out these two pieces you have just drawn. Later, color *Ninjini*'s hair with red tempera. Use blue for the face and the ears, and a bit of black for the inside of these. You cannot forget about painting the back side of the frame, including the piece to be holding it, in order to obtain a fantastic result. Let it dry.

3. Draw a rectangular piece the size of the picture you are going to use and, with an adult's help, cut out it using a pair of scissors or a cutter. Once you have made the hole, take the piece to be used as the frame's support and bend it by the tightest side of the rectangle. Put some glue on it and stick it on the top of the frame's back.

5. Once the paint is dried, draw in black some locks of hair, using a fine brush. Now, you only need to set your picture on the frame! Put some glue on the edges of your favorite picture and set it in the center of the hole. A tip: if you pick a picture of your face, you will become a real Skylander!
